

Rockfon® Spanair® Clip-in Panel System

Features & Benefits

- Durable metal panels for interior applications at new or existing 15/16" suspension grid.
- Choice between Square Edge panels that fully conceal the grid suspension for a "seamless" look or Reveal Edge panels that semi-conceal to articulate the grid.
- Clip-in placement allows for downward accessibility without special tools.
- Panels available in a variety of different finishes and perforation options.
- GREENGUARD Gold certification available with Woodlands™ woodgrain finishes.

Applications

- Airports
- Passenger Terminals
- Retail
- Assembly Halls
- Convention Centers
- Stadiums

Project – Porsche of the Motor City
Product – Rockfon® Spanair® Clip-in Panels

Rockfon® Spanair® Clip-in Panel System should be used in Seismic Design Categories A-C only.

Custom panel sizes available – Contact Rockfon® for information

* See the Rockfon Perforations Brochure for graphic representations of the perforations listed and the complete offering of Premium Perforations available.

** For designer specified Perforation, contact Rockfon Technical Services at 1-800-323-7164 or techservices@rockfon.com.

*** NRC values are dependent on perforation patterns, plenum depth and acoustical backer options. Contact Rockfon Technical Services for more information at 1-800-323-7164 or techservices@rockfon.com.

Note :

- Acoutex™ Backer standard with perforated panel.

- Perforated panel available without Acoutex.

- This system is not approved for exterior use.

Metalwood® Solid Coordinating Colors

Woodscenes® Wood Look Powdercoat Finishes

Anodized Finishes

Colors shown are reproduced as close as possible to actual product color within the limitations of printing technology. Color chips are available upon request and should be reviewed before making a final selection. Variations in color matches of system components to ceiling panels can result from slight differences in texture, room lighting, painting process and subjectivity of observers.

As in Cisca's "Metal Ceilings Technical Guidelines," site conditions can impact installed visual appearance of metal ceilings. Usage of high gloss and metallic finishes in areas of critical lighting may alter final appearance and should be considered for finish selection.

- GREENGUARD Gold certification available with Woodlands™ woodgrain finishes.
- All Wood Look finishes will have the grain pattern applied parallel to the length of the panel.
- Metalwood Woodgrain finishes are a 0.008" vinyl laminate which replicates the look of real wood.
- Woodscenes finishes are a decorative powdercoat finish replicating real wood.
- Woodlands and Woodscenes finishes are suitable for interior and exterior use.
- Metalwood finishes are for interior use only.

Properties

Material

0.032" Aluminum

Fire Performance

Surface burning characteristics:
UL723 (ASTM E84) Flame Spread Index: 0
Smoke Developed Index (UL Labeled): 0

Environment

Aluminum: 78% recycled content
Steel: 30% recycled content
100% locally recyclable

Sustainability

Woodlands™ woodgrain finishes are UL GREENGUARD Gold certified for low VOC (chemical) emissions and meet the California Department of Public Health (CDPH) Standard Method v1.2-2017 for offices and classroom environments

Hygiene

Metal provides no sustenance to microorganisms

Cleaning

✓ Damp cloth
